GOVERNMENT REVIEW.

No. D/1685 of 1916.

Office of the Surgeon-General with the Government of Bombay :

Poona, 21st July 1916.

From

The Honourable Surgeon-General
R. W. S. LYONS, M.D., K.H.P., I.M.S.,
Surgeon-General with the Government of Bombay ;

To

The SECRETARY to GOVERNMENT,
General Department, Bombay.

Sir,

I have the honour to submit, for the information of Government, the report on the Civil Hospitals and Dispensaries of the Presidency for the year 1915.

Statement A.

2. The total number of institutions open on 31st December 1915 was 770 against 760 on 31st December 1914—an increase of 10. The number of State and State-aided institutions rose from 379 to 385.

Buildings.

3. The hospitals generally have been kept in good repair. Owing to financial stringency the only important new additions and improvements carried out during the year were the provision of a new operation room at Dhárwár Civil Hospital and the construction of a cell for insanes at Kaira Civil Hospital. The Surgeon-General's discretionary grant was, however, fully utilized for minor additions and alterations.

4. The new Civil Hospital at Mahábaleshvar which was under construction was completed towards the close of the year.

Statement B.

5. The total number of patients treated during the year was 2,552,467 as compared with 2,485,773 in 1914, showing an increase of 66,694 or 2·7 per cent. Of the total number treated, 61,390 were in-patients and 2,491,077 were out-patients as compared with 61,786 in-patients and 2,423,987 out-patients in 1914. The former shows a slight decrease over the preceding year of 396 and the latter an increase of 67,090.

6. Of the in-door patients treated during the year, 41,853 were cured, 6,754 were relieved, 5,066 were discharged otherwise and 4,340 died. The ratio of deaths per cent. to the total treated was 7·1 as compared with 8·2 in 1914.

7. The number of beds available was 6,583 against 6,495 and the daily average number of patients occupying them was 3,408·8 as compared with 3,556·2 in the previous year. The average daily attendance of out-door patients was 22,165·9 against 22,928·7 in 1914.

8. The decrease in the number of in-door patients treated and the average daily attendance of out-door patients was partly due to the year under review being a healthy year throughout the Presidency and partly to the changes of appointments rendered necessary by the large number of officers surrendered for military duty. The increase in the total number of out-door patients treated is mainly due to the opening of four new dispensaries and two new hospitals.

STATEMENT C-I.

9. The following table shows the principal diseases among the in-door patients treated during the years 1914 and 1915 and mortality due to them:—

Disease.	1915.		1914.	
	Total treated.	Deaths.	Total treated.	Deaths.
Cholera	30	6	290	120
Dysentery	1,279	138	1,529	199
Leprosy	1,519	130	1,502	130
Malaria	6,879	122	7,193	116
Plague	691	201	677	456
Small-pox	583	135	390	91
Tubercle of the lung	1,164	328	1,177	340
Other tubercular diseases... ...	1,206	168	1,156	166
Diarrhœa	1,189	307	1,476	406
Injuries (general and local) ...	8,419	574	8,726	580
Labour cases, normal and abnormal ...	6,195	66	5,378	63

10. The figures for cholera are the lowest noted during the past five years. The admissions for dysentery and diarrhœa were also much less than in previous years. Many of the cases admitted for these diseases into the hospitals in Bombay were *hajis* and roadside cases due to privation and exposure. They were generally in a very collapsed condition when admitted and often succumbed within a few hours.

11. There was a slight fall in the admissions (in-door and our-door) for malaria. The number of persons receiving treatment as out-patients fell from 433,989 to 419,579. This was mainly due to a more healthy season but may also be partly attributed to the distribution of quinine "treatments" to the poorer classes at cheap rates. Owing to the large number of Sub-Assistant Surgeons lent for military duty it was not possible to undertake anti-malarial measures in the Presidency proper and only eight anti-malarial travelling dispensaries could be deputed for duty in the most malarious parts in Sind.

12. The number of cases admitted for tuberculosis was practically the same as in the previous year. The scheme for providing hospitals and dispensaries for the treatment of tuberculosis, referred to in the last report, had to be postponed until the financial situation improves.

13. The admissions for labour cases show a steady rise. The number rose from 3,556 in 1913 to 5,378 in 1914 and to 6,195 in 1915, an increase of 15·4 per cent., of which 11·3 per cent. occurred in Bombay City and 4·1 per cent. in the mofussil. These figures show the growing popularity of maternity wards attached to hospitals and dispensaries; and it is hoped that when we return to normal conditions as regards the hospital staffs and when more facilities have been provided for maternity cases, particularly in the mofussil, a very large increase will take place in the number treated. The percentage of deaths to the total admissions for labour cases was 1·1 which is low considering that a large proportion of the admissions were for difficult abnormal labours.

14. The total number of cases of small-pox treated was 692. Of these, 285 were unvaccinated, 366 were vaccinated in infancy, 6 vaccinated in later life, 17 vaccinated after infection and 2 re-vaccinated. The vaccinal condition was not known in 16 cases.

STATEMENT C-II.

15. Amongst out-door patients malaria furnished the largest number of admissions, closely followed by diseases of the digestive system, then respiratory diseases and diseases of the eye, ear and skin.

STATEMENTS D-I AND D-II.

16. The attendance at Police, Canal, Forest and other State-special institutions was 47,594 as compared with 47,221 in 1914.

17. At the Railway Hospitals the attendance rose from 202,845 in 1914 to 219,228 in 1915.

STATEMENT E.

18. The total number of in-door and out-door patients treated at private non-aided institutions was 2,010,395 as compared with 2,046,198 treated in 1914.

STATEMENT F.

19. Of the total patients treated, 17,559 were Europeans and Eurasians, 1,642,334 were Hindus, 753,249 were Musalmáns and 139,325 belonged to other classes.

20. The attendance at female hospitals and dispensaries rose from 85,898 in 1914 to 94,199 in 1915, showing an increase of 8,301 or 9·7 per cent. The number of women seeking relief at hospitals and dispensaries is steadily increasing and the need for establishing special institutions for the treatment of women and children by women-doctors is recognized; but the scheme for establishing these has been postponed owing to the war.

STATEMENT G.

21. 101,822 surgical operations were performed against 101,467 in 1914. They were performed on 101,243 persons with a mortality of 0·41 per cent. as compared with 0·46 in 1914.

22. In the following remarks the number of operations and deaths include those of patients remaining from the previous year.

23. The removal of tumours and cysts gave 1,527 operations with 9 deaths against 1,527 with 14 deaths last year; operations on bones—2,060 with 25 deaths against 2,276 with 20 deaths; amputations numbered 704 with 34 deaths against 587 with 35 deaths; cataract extractions—1,700 against 1,639; vesical calculi were removed by litholapaxy and lithotrity in 1,069 cases with 20 deaths against 1,174 with 23 deaths; lithotomy was resorted to in 208 cases with 16 deaths against 128 cases with 19 deaths.

24. Abdominal operations, other than those for diseases peculiar to women, numbered 1,626 with 106 deaths against 1,620 with 137 deaths, while for diseases peculiar to women the numbers were 487 with 16 deaths against 254 with 9 deaths. The total number of abdominal operations was 2,113 with 122 deaths against 1,874 with 146 deaths. These include 342 operations for the radical cure of hernia and 93 for abscess of liver.

25. Obstetric operations numbered 1,068 with 30 deaths against 1,130 with 34 deaths and operations for conditions peculiar to women other than obstetric and abdominal amounted to 559 with 3 deaths against 539 with 2 deaths.

26. Notwithstanding the changes of *personnel* caused by the reversion of Medical Officers to the Military Department on account of the war a high standard of surgical work has been maintained.

STATEMENT H.

27. The total income, exclusive of the cash balance, amounted to Rs. 25,52,279 as compared with Rs. 25,18,814 in 1914. Local funds contributed Rs. 2,82,487 and Municipal funds Rs. 4,88,310. The interest on invested capital yielded Rs. 45,009. Subscriptions from Europeans and Indians amounted to Rs. 63,190. Miscellaneous receipts amounted to Rs. 3,95,500, of which Rs. 1,24,166 were realized on account of hospital fees and Rs. 1,22,414 were contributed by the several Nursing Associations. The latter have found it impossible to obtain the contributions required to maintain the associations at their full strength owing to the numerous calls for funds which the war has made on the charitably disposed. The contributions have fallen from Rs. 1,30,322 in 1914 to Rs. 1,22,414 during 1915. The Nursing Associations have furnished nurses to war hospitals, hospital ships and for the private nursing of sick and wounded officers to the utmost limit that their staffs would permit. If they are allowed to suffer financially this must result in a reduction of their establishments and consequent limitation of their usefulness, especially in assisting in war work.

28. The total expenditure amounted to Rs. 25,55,543 as compared with Rs. 25,08,583 in 1914. Deducting from this Rs. 2,20,720 remitted into the Treasury on account of hospital fees, sale-proceeds of unserviceable articles, etc., and Rs. 43,000 invested during the year, the net cost was Rs. 22,91,823 against Rs. 22,95,502 last year. The average cost of each diet was Re. 0-3-6. The percentage of cost borne by Government was 55·7 or the same as in 1914.

STATEMENT J.

29. On 1st January 1915 the invested capital stood at Rs. 10,40,985. During the year Rs. 43,000 were invested and securities worth Rs. 28,300 were sold or withdrawn, leaving a balance of Rs. 10,55,685.

Honorary Staff.

30. The practice of associating private medical practitioners with the staff of Government hospitals which was adopted in the case of Medical Schools and allied hospitals at Poona and Ahmedabad has been working smoothly.

Medical Officers lent for Military and other duties.

31. During the year 1914 it was necessary to surrender for military duty 30 Indian Medical Service Officers who were working in Civil Hospitals and during the year under review 5 more were surrendered, making 35 in all. The appointments from which they were withdrawn were filled temporarily by Indian Medical Service Officers acting in addition to their other duties, by retired Indian Medical Service Officers who returned to duty, by Civil Medical practitioners (Missionaries and others) and by Civil Assistant Surgeons.

32. In 1914 sixteen Military Assistant Surgeons were surrendered and in 1915, four more were surrendered. Some of the vacancies thus caused were filled by retired Military Assistant Surgeons and the rest by Civil Assistant Surgeons.

33. In addition to the number of Indian Medical Service Officers and Military Assistant Surgeons withdrawn for military duty 4 Civil Assistant Surgeons were granted temporary commissions in the Indian Medical Service and two were employed as Assistant Surgeons at Basra and Jask. Besides these, 58 Civil Sub-Assistant Surgeons were lent to the Military Department, 14 more are working at the war hospitals opened by this Government and 2 are lent for civil work at Basra.

34. Thus 135 Medical Officers, in all, of various grades have been lent for war purposes. This no doubt caused some dislocation of hospital work, but the inconvenience was small when compared with the advantage to the Military Department of being able to obtain at short notice the services of so many trained Medical Officers.

35. Arrangements were made at certain Civil Hospitals for the treatment of sick and wounded British Officers from overseas. For this purpose 12 beds were set apart at the Sassoon Hospitals, Poona. At St. George's Hospital, Bombay, no fixed number of beds was allotted, but on an average 20 beds were constantly occupied. For the treatment of sick and wounded Indian troops 50 beds were set apart at the Sassoon Hospitals, Poona, where in addition to receiving men direct from the front cases were sent from the neighbouring Military Hospitals for special nursing or special operative treatment. Similar arrangements were made in the Free-Church Mission Hospital, Poona, in which 50 beds were reserved for Indian sick and wounded. The statistics of these cases are not included in this report as they form part of the medical statistical return of the Army, and will appear in the Army Medical Department Report for 1915.

I have the honour to be,

Sir,

Your most obedient servant,

R. W. S. LYONS, M.D., K.H.P.,

Surgeon-General, I. M. S.,

Surgeon-General with the Government of Bombay.

APPENDIX I.

CIVIL HOSPITAL AND DISPENSARY STATISTICS.

STATEMENT A.

Showing the number of Civil Hospitals and Dispensaries in the Bombay Presidency during the year 1915.

[Total Population of the Province—27,034,317.]

Class of Civil Hospital and Dispensary.	Number open on 31st December 1914.	Number opened during the year 1915.	Number closed during the year 1915.	Number open on the last day of the year 1915.	Remarks.
1	2	3	4	5	6
I.—State—Public ...	51	...	...	51	
II.—State—Special—					
(i) Police ...	5	...	...	5	
(ii) Forests and Surveys ...	1	...	...	1	
(iii) Canals ...	5	...	...	5	
(iv) Others ...	15	...	...	15	
III.—Local and Municipal Funds ...	285	(*a*) 4	...	289	(*a*) Dahanu Dispensary in Thána District, Navagam in Kaira District, Rajpur-Gomtipur in Ahmedabad District and Warah in Larkhana District.
IV.—Private—Aided ...	17	(*b*) 2	...	19	(*b*) Mission Hospital, Larkhana, and Alexandra Hospital, Sukkur.
V.—Private—Non-aided ...	333	(*c*) 24	(*d*) 20	337	(*c*) Eight in Southern Marátha Country, 3 in Thána District, 2 each in Bombay City, Thána Agency and Ratnágiri District and 1 each in Ahmednagar, Sholápur, Surat, Kaira and Ahmedabad Districts and Mahi Kántha and Cutch Agencies. (*d*) Thirteen in Káthiáwár, 4 in Surat Agency, and 1 each in Poona and Sátára Districts and Sátára Agency.
VI.—Railways ...	48	(*e*) 1	(*f*) 1	48	(*e*) Railway Dispensary, Dhuskheda. (*f*) Railway Dispensary, Jalgaon.
Total ...	760	31	21	770	

CLASSES I AND II.—These include all institutions maintained by provincial funds and under Government management. The fact that an institution possesses endowments or receives contributions from local funds or private subscriptions has not been regarded as a reason for not classing it as 'State' when provincial and imperial funds are practically responsible for all the charges connected with it. Class I—'Public' are State Dispensaries which are open to the poorer classes of the public. Class II are State Dispensaries which serve only a special section of the public as indicated in the sub-classification attached.

CLASS III.—Local fund dispensaries include all institutions which are vested in local boards or municipalities or guaranteed or maintained by local or municipal funds. The fact that such an institution is aided by private subscriptions, or receives assistance from Government in the shape of part of the salary of the medical officer, grants of medicine, or otherwise, has not been regarded as a reason for not classing it as a local fund dispensary, when its existence is practically dependent upon local funds.

CLASS IV.—Comprises institutions supported by private subscriptions or guarantee, but receiving aid from Government or local funds.

CLASS V.—Comprises institutions maintained entirely at the cost of private individuals or associations. The fact that Government supplies superior inspection or registers has not been regarded as a reason for not treating it as a private non-aided dispensary.

CLASS VI.—Comprises all railway dispensaries, whether maintained by State railways or others.

Annual Reports.—
Report on Civil Hospitals and Dispensaries in the Bombay Presidency for the year 1915.

GOVERNMENT OF BOMBAY.

GENERAL DEPARTMENT.

Order no. 6025.

Bombay Castle, 5th September 1916.

Letter from the Surgeon General with the Government of Bombay, no. D.—1824, dated the 12th August 1916:—.

"I have the honour to forward the Annual Report on the Civil Hospitals and Dispensaries of the Bombay Presidency for the year 1915 and to state, for the information of Government, that there is nothing in it, the immediate publication of which can be considered of doubtful expediency."

ORDER.—The report should be published.

P. W. MONIE,
Secretary to Government.

To

The Surgeon General with the Government of Bombay,
The Sanitary Commissioner for the Government of Bombay,
The Commissioner in Sind,
The Commissioner, N. D.,
The Commissioner, C. D.,
The Commissioner, S. D.,
All Collectors and the Deputy Commissioner, Upper Sind Frontier,
The Municipal Commissioner for the City of Bombay,
The Municipal Secretary, Bombay,
The Accountant General,
The Compiler, General Administration Report for 1915-16.
} With copies of the report.

The Private Secretary to His Excellency the Governor,
The Editor of Government Publications,
The Government of India (by letter no. 6026, dated the 5th September 1916),
The Under Secretary of State for India (by letter).
